May 28, 2026

Dear Town of Astatula Water Customer:

Enclosed is the Town of Astatula's 2025 Annual Drinking Water Quality Report for Public Water System ID #3355000.

We are pleased to report that the Town's 2025 drinking water results are excellent. The report reflects that the Town's water system continues to provide safe, dependable, and high-quality drinking water to our customers. The testing and monitoring results included in the report show that our drinking water met applicable federal and state drinking water standards.

This is outstanding news for our community and reflects the continued effort to properly monitor, maintain, and protect the Town's water system. The Town remains committed to providing safe drinking water, maintaining regulatory compliance, and continuing improvements that protect the health and welfare of our residents and utility customers.

The report also provides helpful information about where your water comes from, how it is treated, how water quality is monitored, and what the test results mean. We encourage all customers to review the report and stay informed about the quality of their drinking water.

If you have any questions about the report or the Town's water utility, please contact Town Hall at (352) 742-1100 or the Town's water operator, Purified Water Services, LLC, during normal business hours.

Thank you for your continued trust and support as we work to provide safe, reliable, and high-quality drinking water to the Town of Astatula.

Respectfully,

Mayor Zane Teeters Jr.

Town of Astatula
